

Poly AI & Innovation

Future of Work has accelerated...
and it's centered around
experiences

AI can help solve meeting challenges

HP Confidential. For HP and Partner use with Customers under HP CDA only.

Show up at your best

Advanced camera capabilities including auto framing, multi-camera streams, auto image correction, and lighting adjustments allow end users to connect and collaborate with colleagues at the office or remote.

Sound & hear | Loud & clear

AI based Noise Reduction filters inbound and outbound noise to optimize voice clarity so you can move freely.

Powered by AI

So, you can...
collaborate effortlessly.

Hear What Matters

Poly's innovative audio technologies filter distractions to keep your meetings on track

Poly NoiseBlock AI Technology

Keeps the conversation on track using machine learning to recognize and block non-verbal noises.

Sound Reflection Reduction

Enhances voices in the meeting room by removing audio reverberation experienced by hard surfaces.

Powered by AI

Poly Acoustic Fence Technology

Shields your calls from distracting outside voices and sounds using your conference room microphones to create a defined sound zone.

WindSmart Technology

Provides wind noise reduction from background noise caused from strong breezes of up to 14 mph

Active Noise Cancelling (ANC)

Keeps you focused no matter where you work.

Personal Collaboration Powered by AI

AI Noise Reduction

Make every conversation shine with an AI machine-learning algorithm that intelligently recognizes and reduces background noise to enhance call clarity.

Poly Voyager Free 20

AI Voice Commands

Answer a call with your voice. These headsets use machine learning to generate an algorithm trained to recognize verbal answer and ignore commands in 10 different languages.

Poly Voyager Free 60 Series
Poly Voyager Surround Series

NoiseBlockAI™

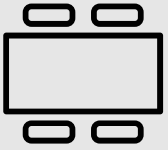

Introducing NoiseBlockAI on Poly headsets. Headsets w/ NoiseBlock AI use machine learning to identify & block common non-verbal background noises on calls so your voice is heard clearly.

See What Matters

Poly DirectorAI Perimeter: enhance your meeting experience by setting a perimeter on the camera framing.

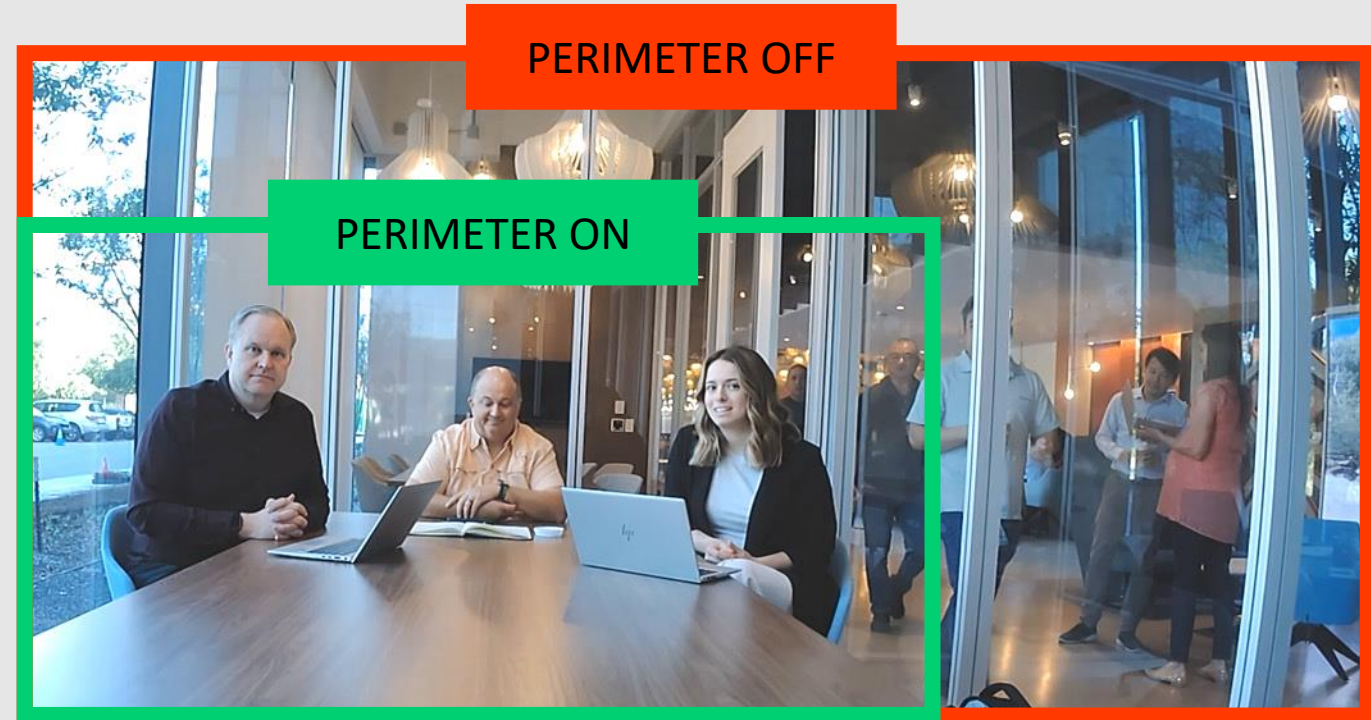

ENJOY MODERN
MEETING SPACES

DISTRACTION FREE
COLLABORATION

Meeting spaces that are open or utilize glass walls can present challenges when it comes to automatic camera framing.

With DirectorAI perimeter, you can focus on your meeting while your camera keeps distractions at bay.

Powered by AI

AI for equitable meetings

Smart camera technology designed to create an equitable experience across hybrid meetings.

Group Framing

Speaker Framing

Choose between different framing and tracking modes.
