

MANAGED SERVICES

Firewall Hardware Management & Support Package

IntegraONE's Managed Networking team brings together a management and support services package to help you manage the day-to-day office needs of your business. Our managed networking team will provide the hardware needed to experience an excellent network security solution, protecting you against cyber threats, such as known exploits, malware and malicious websites using continuous threat intelligence.

Along with providing the hardware and software necessary, our managed networking team will provide you unlimited remote and on-site support.

Key Benefits of Our Firewall Package

- Delivery of an industry best threat protection performance and ultra-low latency firewall at each of your office locations
- Proactive Maintenance Performed by IntegraONE's Managed Networking Team – including updates to Firmware, OS, Software and more
- Unlimited firewall support on-site and remote by our highly skilled technicians – available by phone call or email for quick, elevated support
- Routine maintenance and health checks on your device by our staff with a predefined compliance checklist that analyzes your deployment and highlights best practices to improve your overall security posture
