

About Managed Services

Whether your organization is a small to medium business looking for a reliable and dedicated IT team, or a larger company looking for support on a particular project, IntegraONE can customize a managed solution for you.

Working with IntegraONE, you will see increased user productivity and uptime, better network stability, decreased security risk, and lower overall IT costs. Everything is customized to make sure we move those needles as much as possible for you, in your unique environment and circumstances. Our approach is different. We don't just put a solution in motion and walk away. We combine remote and on-site steering to ensure all aspects of the technology are monitored closely.

“

Since partnering with IntegraONE, we have been extremely impressed with their ability to understand and respond to our IT needs. Their engineers carry a high degree of technical knowledge spanning a range of products and services, supporting us remotely and on-site in a quick and easy-to-interpret manner. Our management is pleased with the increase in productivity, reliability, and the overall health of our IT environment since IntegraONE's involvement.

MICHAEL BOYER, Vice President of Information Technology, Lebanon Federal Credit Union
